CITYMASTER™
PNEUMATIC WASTE TRANSFER SYSTEM

Let's Make Life Better

CITYMASTER™

*Pneumatic waste transfer solution
(PWCS /AWCS)*

The clean and smart city design requires modern methods to collect waste.

The pneumatic vacuum pipeline collection technology called PWCS / AWCS makes the air cleaner and the environment green.

We can do it together!

Just ***Drop&Go™***
- it's so easy !

CITYMASTER™

It is so **Easy**
— Just **Drop & Go!**

- Everything has been engineered for you with passion
- Our goal is to make your life easier

Easy

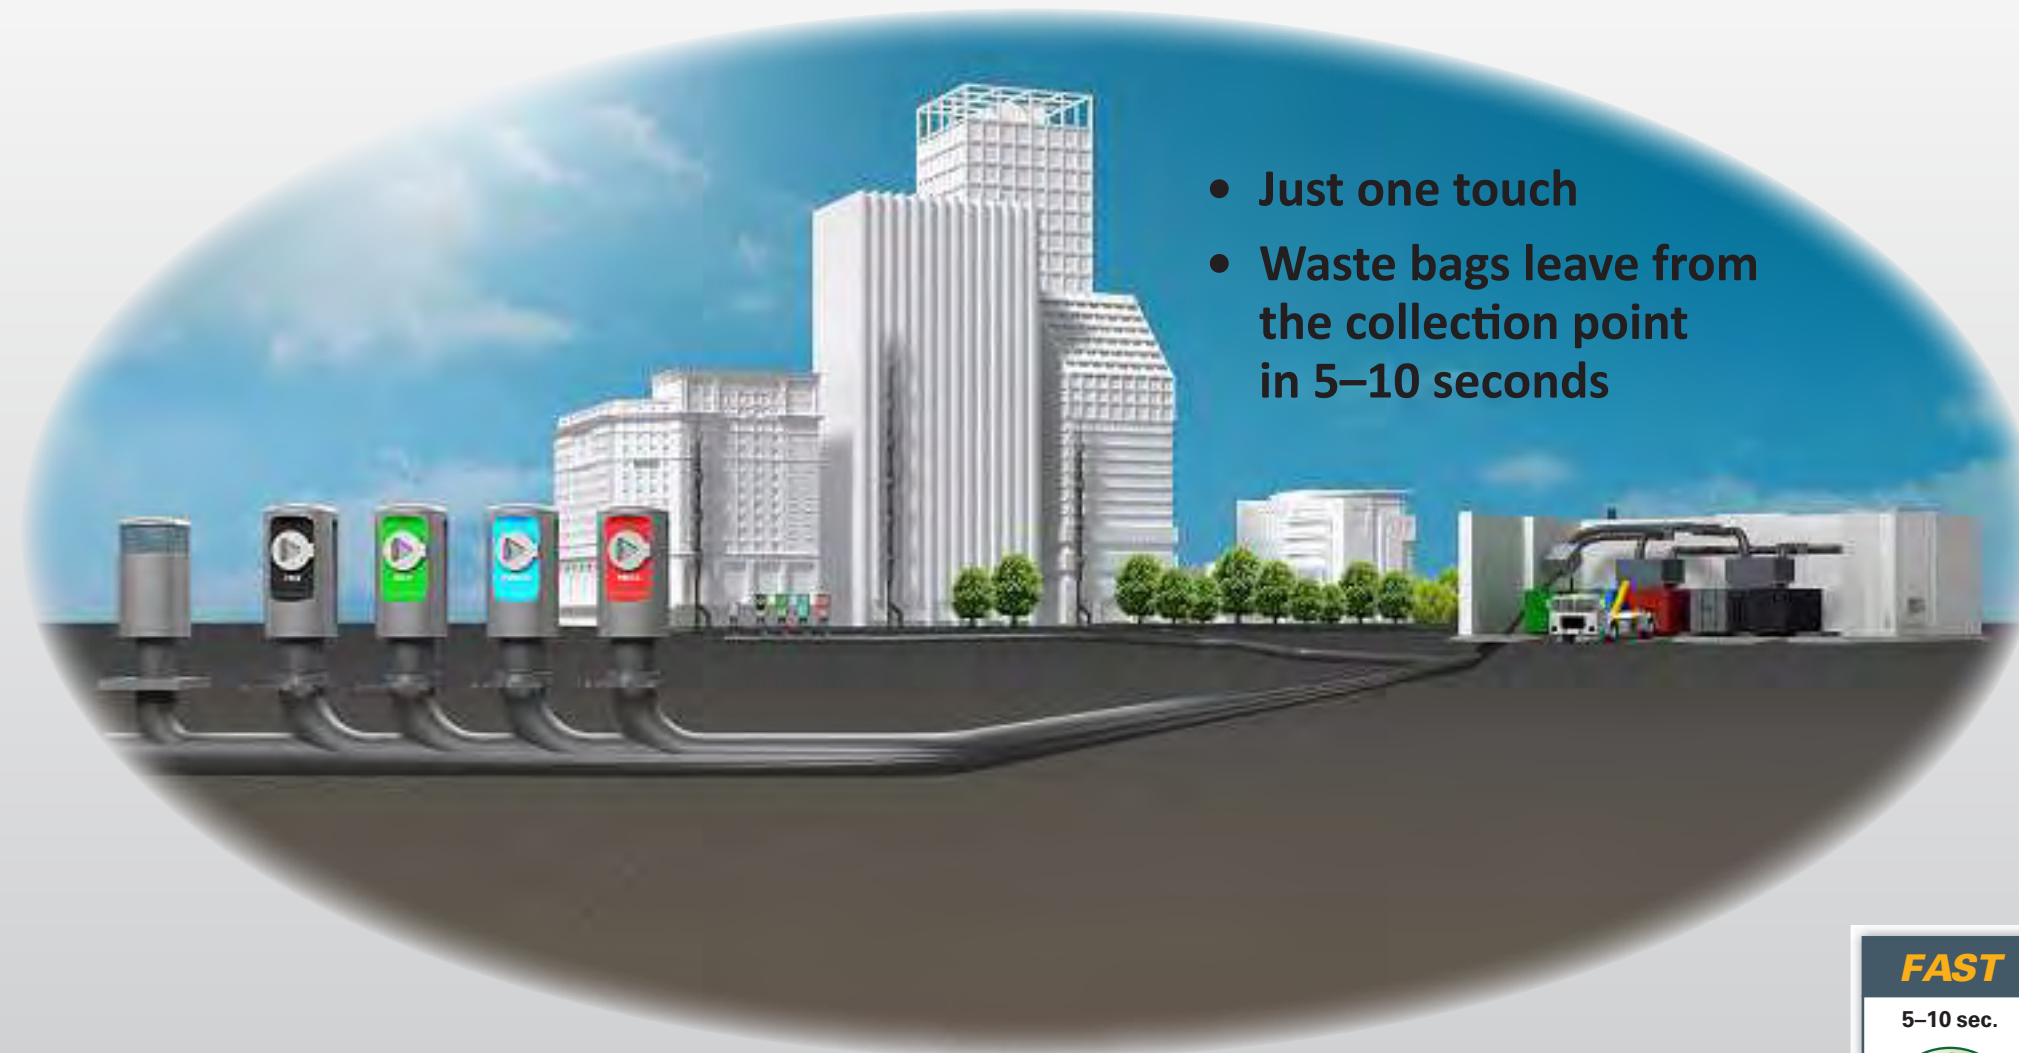

Fast

Safe

CITYMASTER™

It's *faster than thought*

- Just one touch
- Waste bags leave from the collection point in 5–10 seconds

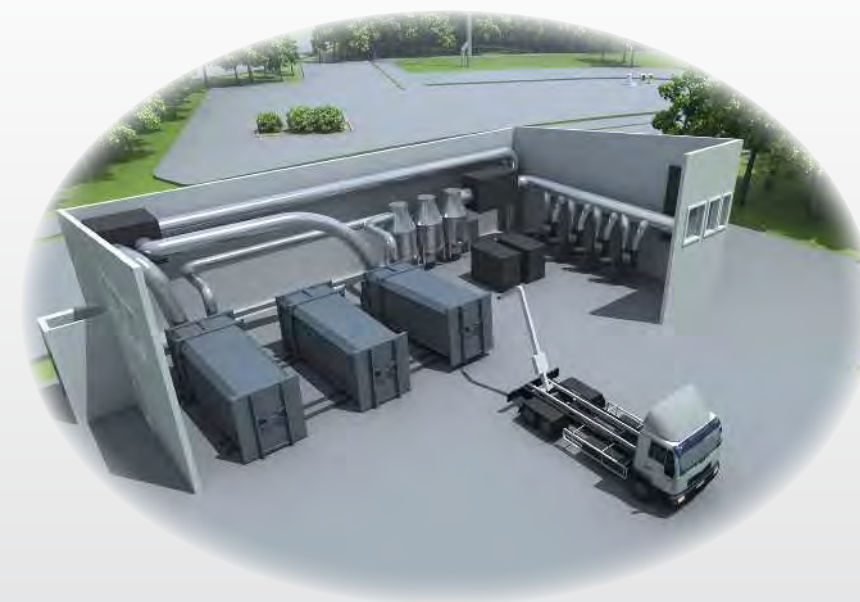

FAST

5–10 sec.

Easy
Fast
Safe

Safety in control

- CITYMASTER transfers the waste in the closed underground pipe network to the central waste terminal
- It removes heavy waste truck traffic from the streets
- Say goodbye to odour and dirty waste bins

"Ready to go"

Innovation, Flexibility and Efficiency

All-new CITYMASTER[™] - it is designed to fit everywhere.
The intelligent design and power features provide major freedom
for flexible installation.

- Motor-powered separation!
- Low height design – only one floor needed!
- Fully sealed filter system – the smallest footprint ever
with high vacuum power!

Integrated Motorised Waste/air Separation (IMWS[™])
– This innovation has probably the highest separation power.
It is only 3.9 m high compared to old-style gravity cyclones
with a maximum height of 10 m.
The motorised separation power fits into today's architectural
designs and increases the lifespan of the filters – It's again
proof of our Smart Design.

Fully sealed Room Less Filter Solution (RLFS)
- No more dirty filter rooms!
Efficient filters are packed into fully sealed cases.
Small footprint filter cases can be placed nearly anywhere!
